NOTE: Veneered door jambs are not designed to be used as window extension jambs.

20 MINUTE WHI FRAMES

VENEERED DOOR FRAME

Door Frames are sold by sets which include jamb sides, head and respective T-stops. Window Frames are sold by individual components on a lineal foot basis. Pieces are stamped with Warnock Hersey certification and must be machined by a WHI certified door hanger to receive a 20 minute label. Installation must be done in accordance with manufacturer's instructions. A pressure-sensitive smoke gasket (category "H") must be attached to the frame as part of the rated assembly, which gives the frame a "S" label rating. A positive pressure certification may be achieved with the addition of an edge sealing gasket (category "G").

NOTE: A positive pressure frame may be used with a category "B" door for a positive pressure opening.

VENEERED SIDELIGHT/BORROWED LIGHT WINDOW FRAME

RATED VENEERED FRAMES ARE AVAILABLE IN STANDARD SIZES ONLY

NOTE: Veneered door jambs are not designed to be used as window extension jambs.

300 SERIES - VENEERED & SOLID DOOR FRAMES, SIDELIGHT FRAME

45/60/90 MINUTE WHI FRAMES

45, 60 and 90 minute jambs are manufactured by Ferche using one of two core materials. Laminated Core will be used except when door openings exceed Laminated Core's maximum opening size of 6/0 x 8/0 in 45 minute and 60 minute ratings and maximum size of 4/0 x 8/0 in 90 minute openings. Jambs are 3/4" (+/- 1/16) thick. Georgia Pacific's "Firestop®" composite mineral core substrate will be used for larger openings, up to 8'0" x 9'0". Frame is 1" thick. Both frame types are suitable for positive pressure certification. "S" label certification is achieved with the proper Category "H", or smoke/draft control gasket. These jambs are certified by Warnock Hersey (Intertek Testing) and must be machined by a company registered with them. Installation must be done in accordance with manufacturer's instructions.
